

PREPARED FOR	PROJECT
Sumanth	Multilingual AI Voice Agent + WhatsApp Lead Automation

Solution Overview

A custom multilingual AI voice agent (Saanvi) that answers and makes calls in natural Indian languages, understands the conversation in real time, and responds like a trained human agent. At the end of every call the AI automatically classifies the lead (hot / warm / cold) and instantly triggers a personalized WhatsApp message to the caller through the WhatsApp Business API — so no lead is missed and every caller gets an instant follow-up.

What's Included in the One-Time Setup (₹60,000)

- Custom multilingual AI voice agent — build, deployment & go-live
- Speech-to-text + natural text-to-speech tuned for Indian languages
- Conversational AI logic & prompt engineering customized to your business
- Post-call AI lead classification (hot / warm / cold)
- WhatsApp automation — auto-send message via WhatsApp Business API based on the classification
- Integration with your calling number, testing & handover

Pricing

Item	Description	Cost
One-Time Setup	AI voice agent build, deployment, prompt engineering, training & WhatsApp automation (fully included)	₹60,000
Call Usage	Charged only on actual talk-time across all calls	₹3 / minute
Monthly Infrastructure & Maintenance	SIP trunk + phone number + server + database. Runs on your infrastructure; billed to your usage.	≈ ₹4,000 / month

Note: The ≈₹4,000/month is an estimate covering SIP trunk, phone number, server and database. It is usage-based and will vary slightly with call volume. Setup fee is one-time; call usage is billed monthly on actual minutes. All prices are exclusive of applicable GST.

Terms

- Setup fee (₹60,000) payable in advance to begin development.
- Call usage (₹3/min) invoiced monthly based on actual call minutes.
- Monthly infrastructure billed at actuals (≈₹4,000/month typical).
